DECK GRATING

White ABS & PVC • 187.5 mm / 300 mm

PRODUCT OVERVIEW

Interlocking deck gratings for curved and straight pool edges. The ABS and PVC blend combines durability and flexibility with an anti-slip surface. Designed for efficient water drainage in residential, commercial, and resort pools, with resistance to UV rays, moisture, and chemical exposure.

CURVED DECK GRATING

KEY FEATURES & BENEFITS

Two Width Options

187.5 mm and 300 mm widths suit both curved and straight pool edges.

Anti-Slip Surface

Safety and comfort in high-traffic or constantly wet areas.

UV-Stabilized Construction

Prevents discoloration, cracking, and material fatigue from prolonged sunlight exposure.

Interlocking Modular Design

Quick installation, secure fitting, and effortless maintenance over time.

Versatile Pool Applications

Modern aesthetics, long-lasting performance, and safety for residential, commercial, and resort pools.

High-Quality ABS & PVC

Durability, flexibility, and resistance to environmental wear.

MATERIALS & CONSTRUCTION

Premium ABS & PVC Blend

White, UV-stabilized construction with an anti-slip surface. Built to retain strength and finish under exposure to sunlight, moisture, pool chemicals, and environmental wear.

DECK GRATING

Technical Datasheet & Product Views

MODEL RANGE & TECHNICAL DATASHEET

Code	Color	Material	Description	Size	L	W	H
CX-4021	White	ABS & PVC	Anti-slip surface	187.5	190.5mm	13mm	20mm
CX-4022	White	ABS & PVC	Anti-slip surface	300	292mm	13mm	32mm

The table and drawing retain their respective source values. The drawing does not identify its measurements as L, W or H.

EXPLODED VIEW

The source supplies an assembled grating photograph and dimensional views only. No exploded drawing or component register is provided.

FOR ALL THE RIGHT REASONS...

The Deck Gratings are engineered with a premium blend of ABS and PVC, delivering exceptional durability, flexibility, and resistance against harsh pool environments. Available in 187.5 mm and 300 mm widths, they cater to both curved and straight pool edges with precision and reliability. Their anti-slip surface enhances safety, making them ideal for wet and high-traffic zones. Built to withstand UV rays, moisture, and chemical exposure, they maintain their strength and pristine white finish over time. These gratings not only ensure efficient water drainage but also elevate the overall look of any poolside setting with a clean, modern appearance.
