END CAP

UV White ABS • CX-40112

PRODUCT OVERVIEW

The End Cap is an essential component for any professional pool plumbing system, ensuring complete and reliable sealing of unused pipe ends. Crafted from high-quality white ABS material, it offers outstanding impact resistance and long-term durability even under harsh environmental conditions. Its precision-fit design guarantees a watertight closure, effectively preventing leaks, backflow, and pressure loss. Resistant to pool chemicals and temperature variations, it maintains performance and structure over time. Simple yet critical, this fitting enhances hydraulic stability across the entire pool network. A must-have for installers seeking secure and efficient plumbing integrity.

KEY FEATURES & BENEFITS

Leak-Proof Sealing

Secure, watertight closure for unused pool pipe ends.

Durable ABS Material

High-strength ABS offers long-term resistance to impact and chemicals.

Precision Fit Design

Perfect alignment and tight sealing to maintain internal system pressure.

Weather & UV Resistant

Reliable outdoor performance without cracking or fading.

Prevents Water Loss

Stops leakage and backflow, preserving overall hydraulic efficiency.

Essential Pool Component

For professional plumbing, pool, and spa installations requiring safety and reliability.

MATERIALS & CONSTRUCTION

High-Quality White ABS

UV White ABS construction with resistance to impact, pool chemicals, UV damage, and environmental wear. Smooth interior surfaces and precise dimensions support pressure retention.

Technical Datasheet & Product Views

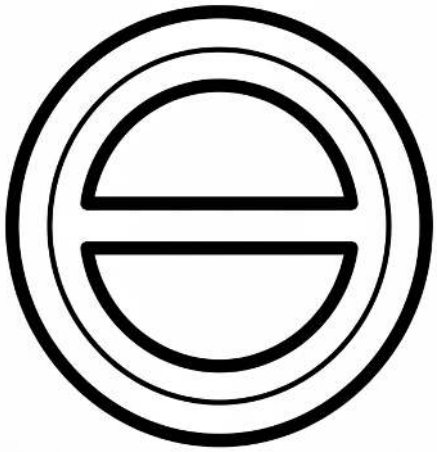

TECHNICAL DATASHEET

Code	Color	Material	Description	Flow Rate (L/min)	L	W	H
CX-40112	UV White	ABS	56 Dia	115	51mm	56mm	12mm

SIDE VIEW

FACE VIEW

Source check: the table states L 51mm, W 51mm and H 12mm; the supplied drawing states Ø56, Ø48 and H = 4mm. All values are retained as supplied; confirm the differing dimensions before final print artwork.

EXPLODED VIEW

The source supplies assembled cap photographs and dimensional views only. No exploded drawing or component register is provided.

FOR ALL THE RIGHT REASONS...

Built to withstand years of continuous use, the End Cap combines functional strength with refined engineering. Its smooth interior surface and precise dimensions ensure stable pressure retention and consistent system balance. Whether used in residential, commercial, or spa installations, it provides dependable sealing against water escape and contamination. The ABS construction resists UV damage and environmental wear, ensuring a clean, professional appearance throughout its lifespan. Easy to install and remove, it minimizes maintenance effort while maximizing reliability. A robust finishing component that ensures your pool system remains leak-free and efficient.
