SPIRAL WOUND VACUUM HOSE

STANDARD CUFF • 38 mm

CX-T134D / CX-T134A

PRODUCT OVERVIEW

Designed for durability, flexibility and high performance in professional pool maintenance. Dual-colour construction enhances visibility, while the flexible design ensures smooth maneuverability around corners and pool edges.

KEY FEATURES & BENEFITS

Spiral-Wound Structure
Exceptional crush resistance for steady, powerful suction during pool cleaning.

UV & Chemical Resistance
Materials protect the hose from fading, cracking and long-term environmental damage.

Flexible, Anti-Kink Design
Smooth movement around corners without tangling or collapsing.

Leak-Proof Cuff Connection
Secure fit with standard vacuum heads for uninterrupted suction flow.

Lightweight, Durable Build
Easy handling while withstanding heavy professional use.

High-Visibility Dual Colour
Improves underwater tracking and overall control during operation.

MATERIALS & CONSTRUCTION

UV & Chemical-Resistant Materials
Endures pool environments and long-term outdoor exposure without losing flexibility or shape.

Reinforced Spiral Winding
Resists crushing, bending and kinking while maintaining powerful suction. Polymer grade is not specified.

MODEL RANGE

CX-T134D	CX-T134A
15 m	09 m
38 mm / 1½″	38 mm / 1½″

VACUUM HOSE

Technical Datasheet & Component Identification

MODEL RANGE & TECHNICAL DATASHEET

CODE	DESCRIPTION	LENGTH	SIZE
CX-T134D	Spiral Wound Vacuum Hose, Standard Cuff (15m x 1½″)	15 m	38 mm
CX-T134A	Spiral Wound Vacuum Hose, Standard Cuff (09m x 1½″)	09 m	38 mm

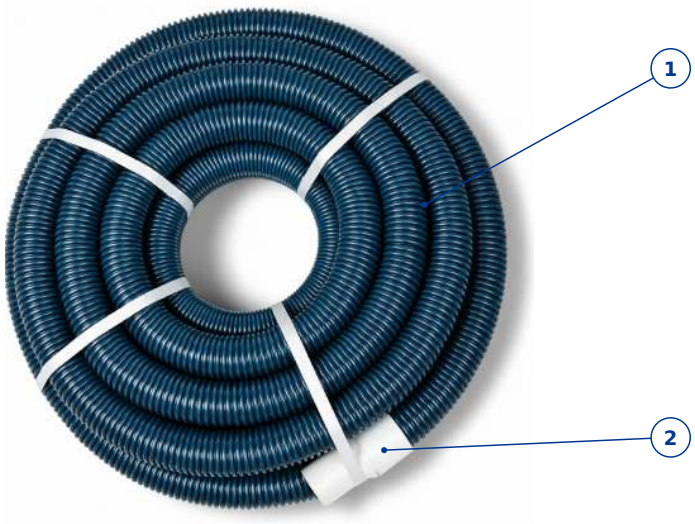

PERFORMANCE & APPLICATION

Whether used in residential backyards or large commercial facilities, the hose maintains powerful suction performance over time. Its sturdy spiral structure resists crushing, bending and kinking for uninterrupted flow during cleaning.

Under heavy workloads, it minimizes wear and tear, extending operational life. Lightweight yet exceptionally strong, it allows effortless handling and reduces user fatigue while delivering top-tier results.

EXPLODED VIEW / COMPONENT IDENTIFICATION

COMPONENT REGISTER

1 Spiral-wound hose
Dual-colour, flexible, anti-kink construction.

2 Standard cuff
Secure connection with standard vacuum heads.

ASSEMBLED REFERENCE

No exploded assembly or spare-parts list is supplied. Callouts identify the assembled hose and cuff. Product photos do not establish which length variant is shown.

FOR ALL THE RIGHT REASONS

Built to perform: strength, control and reliability for the demands of pool professionals and efficient everyday cleaning.
