SQUARE MAIN DRAIN

White ABS • CX-40115

PRODUCT OVERVIEW

The Square Main Drain is designed to deliver powerful and efficient water circulation in demanding pool environments. Constructed from premium-grade ABS with a clean white finish, it provides exceptional durability against corrosion, pool chemicals, and UV damage. Its impressive 850 L/min flow rate ensures rapid drainage and steady water movement, essential for maintaining crystal-clear pool conditions. The precision-molded square grid promotes even suction distribution, minimizing the risk of blockage and suction hazards. This design also enhances filtration efficiency by directing debris flow more effectively. Built with reliability in mind, it performs flawlessly under continuous operation in large-scale pool systems.

KEY FEATURES & BENEFITS

Heavy-Duty ABS Construction

Long-lasting resistance to corrosion, chemicals, and UV exposure.

850 L/min Flow Rate

Rapid water drainage and superior pool circulation.

Square Grid Design

Even suction distribution; minimizes clogging or debris buildup.

High-Flow Stability

Engineered for stability under high-flow conditions; ideal for commercial and public pools.

Easy Installation

Reduces setup time and supports long-term maintenance efficiency.

Professional-Grade Performance

Combines safety, durability, and hydraulic precision for consistent performance.

SQUARE MAIN DRAIN

MATERIALS & CONSTRUCTION

Premium-Grade White ABS

Heavy-duty ABS with a clean white finish. Rigid construction resists deformation under high hydraulic pressure and provides durability against corrosion, pool chemicals, and UV damage.

Technical Datasheet & Product Views

TECHNICAL DATASHEET

Code	Color	Material	Description	Flow Rate (L/min)	L	W	H
CX-40115	White	ABS	Heavy-duty ABS	850	305mm	305mm	32mm

SIDE VIEW **FACE VIEW**

Source check: table dimensions are 305mm × 305mm × 32mm; drawing labels are 300, 276 and 18. All values are retained as supplied. Reconcile these dimensions before final print artwork.

EXPLODED VIEW

The source supplies assembled face and side views only. No exploded drawing or component register is provided.

FOR ALL THE RIGHT REASONS...

Engineered for strength and performance, the Square Main Drain is particularly suited for commercial and public pool installations. Its rigid structure resists deformation under high hydraulic pressure, guaranteeing stability and long service life. The square design provides a secure fit and easy installation across various pool surfaces, simplifying both setup and maintenance. By ensuring smooth, consistent drainage, it helps preserve balanced water levels and cleaner circulation. This model exemplifies engineering precision and practicality, offering a blend of safety, functionality, and durability. Whether for new construction or system upgrades, the Square Main Drain delivers professional-grade performance built to last.
