TEST KIT REFILL

15 ml • Pool Water Testing

PRODUCT OVERVIEW

Designed to keep pool water testing consistent, accurate and hassle-free. Precisely formulated reagents deliver reliable pH and chlorine readings, helping maintain ideal water balance and eliminate fluctuating chemical levels through laboratory-level accuracy in routine checks.

KEY FEATURES & BENEFITS

Full Test Kit Compatibility
15 ml refill bottles engineered for CorexPool pH and chlorine testing kits.

Precise, Reliable Readings
Consistent chemical readings with every pool water test.

Easy-Pour Design
Minimizes spillage and contamination for clean, efficient refilling.

Compact, Durable Packaging
Safe storage and extended reagent shelf life.

Cost-Effective Refills
Maintain regular testing routines without compromising accuracy.

Professional Maintenance
Uninterrupted, dependable water quality monitoring for maintenance teams.

TECHNICAL DATASHEET

PRODUCT
Test Kit Refill (15ml)

BOTTLE VOLUME
15 ml

COMPATIBILITY
CorexPool pH and chlorine testing kits

APPLICATION
Routine pool water testing

MATERIALS & CONSTRUCTION

Durable, corrosion-resistant bottle material protects the reagent from environmental stress. The sturdy structure maintains stability under varying temperatures or humidity. Exact material grade is not specified.

EXPLODED VIEW / COMPONENT IDENTIFICATION

EASY-POUR DESIGN
Smooth, controlled dispensing minimizes air exposure, preserves reagent integrity and helps avoid contamination, mess and waste.

REFILL BOTTLE
Compact, strong packaging for transport and frequent on-site use.

USE & STORAGE
Designed for homeowners and professional technicians, offering fast, efficient, reliable testing. With proper storage, the source states dependable accuracy from the first test to the last.

Assembled photo reference only: no exploded drawing, part codes or dimensions are supplied.
